

000

"Full-stack developer with extensive experience in software development dating back to 2002, when I began programming with C++, Visual Basic, HTML, and hexadecimal code editing. With over 4 years of professional expertise in JavaScript/TypeScript, React, Node.js, and a solid grasp of Java-Angular stacks from ongoing professional training, I specialize in building scalable, secure, and performant applications. My rich background as a field and administrative police officer has endowed me with rigorous analytical skills, stress management, strong teamwork, and meticulous attention to detail. Passionate about technology and committed to continuous improvement, I bring structured problem-solving, reliability, and innovation to every project, ensuring high-quality outcomes tailored to complex professional environments."

SELECTED PROJECTS

<u>API Rest</u> "Stateless"

- Developed a secure RESTful API for a seasonal rental platform using Java 17, Spring Boot, and MySQL.
- Integrated JWT authentication, file uploads, and messaging system.
- Deployed with Docker and secrets managed via HashiCorp Vault.

Chemin de Conscience

- A full-stack web application built with Next.js and TypeScript && deployed with Vercel.
- Integrated Mailgun for secure online comment post via email confirmation.
- Configured DNS with OVH to handle mail services and security.

House Way

- Vacation rental platform using React and Node.js, with user authentication (JWT).
- Optimized backend performance, reducing load times by 30%.
- Deployed on GitHub Pages via Pipeline CI / CD for frontend and Heroku for backend Node.js Express server.

Waver

- Social networking application with personalized news feeds, built using Node.js, Express, Pug, and Bootstrap.
- Full server side application.

EDUCATION

Full-stack developer Java - Angular

OpenClassrooms - Online

Expert in full-stack programming with Java and Angular in software design and quality

2025

Full-stack Developer React (TS) - Node

NX Academy - Online

Learn how to build full-stack application with TypeScript & Modern tools

2023 - 2024

Web Developer

OpenClassrooms - Online

Learn how to build frontend, backend & full-stack application with JavaScript.

2022 - 2023

Bachelor of Bio-Engineering (1st Y)

Gembloux Agro-Bio Tech - ULG

(2018 - 2019)

Criminology & Police

ULG

2014

Bachelor of Psychology (1st Y)

Sartilman - ULG

2011 - 2012

Police Officer

Liège

2007 - 2009

1998 - 2004

Bachelor in computer science

Liége

Learn how to build application with C++, Visual Basic, HTML & build and repair computer

EXPERIENCE

Police Officer

Police Department

Mar 2007 - Present

- Maintain public safety and enforce laws while fostering positive community relationships.
- Conduct investigations and write detailed reports on incidents.
- Train and mentor junior officers in operational procedures and best practices.

Software Developer & Open-source Contributor

NX Academy

Mar 2023 - Present

- Contributed to the development of the software development learning platform using Astro.js.
- Developed and maintained components for the platform, ensuring scalability and performance.
- Collaborated with other contributors, improving platform features, optimizing user experience and write technical file in JavaScript.

Full-stack Developer

OpenClassrooms & Personal Projects

Mar 2021 - Present

- Developed full-stack projects using JavaScript,
 TypeScript, Node.js, React, and MongoDB.
- Implemented frontend and backend features for full-stack applications, including APIs, authentication systems, and user management.
- Designed user interfaces using Tailwind CSS and Bootstrap for responsive web applications.
- Collaborated using GitHub and implemented CI/CD pipelines for continuous integration.
